Herbal worming powder for cats

- Plant-based natural worming cure
- Immediate help for a worm-free intestinal environment
- Special herbal active ingredient formula
- Hypoallergenic, without side effects
- With innovative CORVITALIS® complex

How do I apply petCat Health 3605?

The supplementary feed is simply given over the feed or mixed in with the feed. The daily ration is evenly distributed over all meals. If the cat receives its food only once a day, the daily ration is administered all at once. If the cat receives food twice a day, the daily ration is halved and half of the daily ration is administered per feeding.

The supplementary feed can also be mixed or stirred with water or any other liquid. The result is a paste that can be added to the feed. It is also possible to completely dissolve the supplementary feed and administer it with the water, as a drink.

All Peticare® supplementary feeds can be combined, mixed and administered simultaneously.

What amount (in grams) do I give my cat?

One gram corresponds to one level measuring spoon. The measuring spoon is included in the scope of delivery in the can.

Example cure: One can with 60 grams lasts approx. 60 days.

Example long-term use: One can with 60 grams lasts 120 days

For a course of treatment or one-time application:

The daily amount of supplementary food per cat per day is 1 g. The application of a course of treatment or single application should last 14 days.

For permanent or long-term application:

After a course of treatment or one-time application, it is possible to move on to long-term application. The daily amount of a cure or one-time application can be halved and then used permanently.

petCat Health 3605

Herbal worming powder for cats

Composition:

- Carrot powder
- Coconut flour
- Pumpkin seed powder
- Oregano powder
- Thyme powder
- Black pepper extract with 95 % piperine
